

Take Root Seedlings (everyone)

- Fill the seed cup $\frac{3}{4}$ way full with potting soil, put Day #3 seed in the middle, sprinkle with water.
- As you are doing this, discuss these questions:
 - What do seeds need to grow?
 - What do I need to grow?
 - What things grow around your house?
 - What's the biggest plant you've ever seen?
 - What do you do to grow healthy?
